

RAJATH KIRAN A

Puttur, Karnataka | +91-7483975463 | rajathajeru@gmail.com | linkedin.com/in/rajath-kiran |
github.com/Rajath2005 | rajathkiran.me

SUMMARY

Full Stack Developer and B.E. Computer Science student (CGPA 8.8/10, VTU, graduating 2027) with hands-on experience engineering production-grade distributed systems, networked applications, and AI-integrated platforms using React.js, Node.js, Docker, and Google Cloud Platform. Built and shipped a live multi-user healthcare platform with REST APIs, cloud storage, and authentication pipelines; won 1st place at IEEE I² CONNECT-2K24 competing against 30+ university teams.

EXPERIENCE

Web Developer — Freelance | Nexara | Remote Nov 2024 – Dec 2024

- Built 2 client websites (Plumbing Services + NGO) using WordPress and Divi theme, handling full setup, plugin configuration, and layout customization for each site.
- Designed social media marketing content — Reels and Carousel Posters in Canva — for 3 brand clients, supporting digital presence and engagement.

EDUCATION

B.E. in Computer Science & Engineering 2023 – 2027
Vivekananda College of Engineering & Technology, Puttur | VTU, Karnataka | CGPA: 8.8 / 10.0
Relevant Coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, Database Management Systems, Object-Oriented Programming

Pre-University — PCMC (Physics, Chemistry, Mathematics, Computer Science) 2021 – 2023
Narendra PU College, Puttur | Score: 93.33%

SSLC (Class 10) 2016 – 2021
Morarji Desai Residential School, Machina | Score: 98.08%

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C, C++
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design
Backend & APIs: Node.js, Express.js, REST API Design, FastAPI, WebSockets
Networking & Security: Computer Networks, TCP/IP, DNS, HTTP/HTTPS, Cybersecurity Fundamentals, Cisco Networking Academy
Cloud & DevOps: Google Cloud Platform (GCP), Vertex AI, Firebase, Cloud Run, Docker, Kubernetes, CI/CD Pipelines, GitHub Actions, Linux
Databases: MySQL, PostgreSQL (Neon), MongoDB, Supabase, Firebase, Redis
Other: Generative AI, RAG Pipelines, Prompt Engineering, Gemini API, Google Maps API, Figma

PROJECTS

AyuDost — Full Stack Healthcare Platform 2024 – Present
React.js, Node.js, Express.js, MySQL/PostgreSQL (Neon), Firebase, Supabase, Vertex AI/Gemini, Docker | mediq-health.netlify.app | github.com/Rajath2005

- Engineered a production-grade distributed web application serving 20+ users with appointment booking, hospital locator via Google Maps API, QR-based medicine scanning, and Supabase/Firebase authentication — handling full-stack development (React.js frontend + Node.js/Express.js backend) end-to-end.

- Integrated Vertex AI/Gemini for AI-assisted diagnostics and architected a 10-step RAG pipeline combining Pinecone vector search with MongoDB keyword search, deployed on Netlify with Docker containerization and Cloudinary cloud storage.

COPD Detection & Severity Classification

2025 – Present

Python, PyTorch, Librosa, CNN-LSTM, Scikit-learn | github.com/Rajath2005/COPD-Detection

- Designed and implemented a CNN-LSTM hybrid deep learning model for automated COPD detection and 4-class severity grading on the ICBHI 2017 Respiratory Sound Database (920 recordings, 6,898 annotated respiratory cycles), targeting >90% binary classification accuracy.
- Built a complete audio preprocessing pipeline: noise reduction, Mel-spectrogram generation (128 bands), MFCC extraction (40 coefficients), and data augmentation — automating segmentation of 6,898 respiratory cycles from raw annotation files.

Code Review RL Environment

2025

Python, FastAPI, Docker, Hugging Face Spaces | github.com/Rajath2005/code-review-env | huggingface.co/spaces/BugHunter28/code-review-env

- Engineered an OpenEnv-compliant reinforcement learning benchmark with 3-tier curriculum (easy/medium/hard), 32 hand-crafted Python snippets, dense reward signals, and sandboxed code execution; benchmarked against Qwen2.5-72B-Instruct.
- Containerized and deployed FastAPI server on Hugging Face Spaces via Docker, implementing MDP-standard reset/step semantics, deterministic grading, and strict (0,1) reward clamping for evaluator compatibility.

Englisho — Interactive English Learning Platform

May 2024

HTML5, CSS3, JavaScript, Web Speech API | github.com/Rajath2005/Englisho.io | englisho.netlify.app

- Won 1st place at IEEE I² CONNECT-2K24 (IEEE Mangalore Subsection & VCET, 30+ university teams) for engineering an interactive ed-tech platform with quiz engine, text-to-speech, and dictionary for children learning English.

PutturBus — Real-Time KSRTC Transit Application

2025

Next.js, Physics-Based Engine, Bilingual (Kannada/English) | putturbus.netlify.app | github.com/Rajath2005/PutturBus

- Built a real-time transit app for KSRTC Puttur division with physics-based ETA calculation (speed profiles for Ordinary vs. Express buses), live interactive maps, and native Kannada/English bilingual support, demonstrating systems thinking and real-world problem solving.

Developer Portfolio & Cloud Intelligence Center

2025

HTML5, CSS3, JavaScript, Astro, D3.js, Three.js, Netlify | rajathkiran.me | cloud.rajathkiran.me

- Built and deployed a responsive portfolio showcasing 25+ live projects with an integrated AI assistant, filterable project grid, and blog; maintained a 3D force-directed graph visualization of 50+ Google Cloud badge relationships across AI/ML, Kubernetes, BigQuery, CI/CD, and Serverless domains.

CERTIFICATIONS & AWARDS

- IEEE I² CONNECT-2K24 Winner — IEEE Mangalore Subsection & VCET Student Branch (2024)
- 2× VTU Topper — Code360 30-Day Coding Challenge (Naukri Code360 Platform)
- Google Cloud Arcade 2026 — Silver League, 50+ badges (GCP, Kubernetes, BigQuery, CI/CD, Cloud Run, Firebase, Serverless, Networking, Security)
- Cisco Networking Academy — Introduction to Cybersecurity (May 2026)
- Anthropic — Claude Code in Action, AI Fluency: Framework & Foundations, Claude 101 (2026)
- Google — Google AI Essentials, Google Prompting Essentials, Maximize Productivity With AI Tools (2026)
- Scaler — Node JS Certification, Docker & Kubernetes Fundamentals, React Bootcamp (2025–2026)
- NPTEL — The Joy of Computing Using Python, IIT Madras (Score: 78%, Nov 2025)
- Elements of Artificial Intelligence — University of Helsinki & MinnaLearn
