

RAJATH KIRAN A

Puttur, Karnataka | +91-7483975463 | rajathajeru@gmail.com | linkedin.com/in/rajath-kiran | github.com/Rajath2005 | rajathkiran.me

SUMMARY

B.E. Computer Science student (CGPA 8.8/10, VTU, graduating 2027) with 70+ GitHub repositories, active open-source contributions, and hands-on experience in software development workflows using Git, GitHub, and industry-standard collaboration practices. Built and shipped production-grade full stack and AI/ML systems via GitHub Pull Requests and CI/CD pipelines; won 1st place at IEEE I² CONNECT-2K24 competing against 30+ teams.

EXPERIENCE

Web Developer — Freelance | Nexara | Remote

Nov 2024 – Dec 2024

- Delivered 2 production websites (Plumbing Services + NGO) using WordPress and Divi theme; completed full setup, plugin configuration, and performance optimization within a 6-week engagement.
- Maintained version-controlled codebase with Git, applied standard software development workflows including branching, commit conventions, and deployment pipelines.

EDUCATION

B.E. in Computer Science & Engineering

2023 – 2027

Vivekananda College of Engineering & Technology, Puttur | VTU, Karnataka | CGPA: 8.89 / 10.0

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Pre-University — PCMC

2021 – 2023

Narendra PU College, Puttur | Score: 93.33%

SSLC (Class 10)

2016 – 2021

Morarji Desai Residential School, Machina | Score: 98.08%

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C, C++

Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, TailwindCSS, Bootstrap

Tools & Practices: Git, GitHub, GitHub Actions, Pull Requests, Code Review, Docker, Kubernetes, Linux, CI/CD Pipelines

Databases: MySQL, PostgreSQL (Neon), MongoDB, Supabase, Firebase

Cloud Platforms: Google Cloud Platform (GCP), Vertex AI, Firebase, Cloud Run, Netlify

Other: Prompt Engineering, Generative AI, Gemini API, Figma, Open Source Contribution

PROJECTS

AyuDost — Full Stack Healthcare Platform

2024 – Present

React.js, Node.js, Express.js, MySQL/PostgreSQL, Firebase, Supabase, Vertex AI/Gemini, Docker |

mediq-health.netlify.app | github.com/Rajath2005/mediq

- Built and shipped a production-grade full stack web application (70+ GitHub repositories) implementing appointment booking, Google Maps API integration, QR-based scanning, and Firebase/Supabase authentication — managed end-to-end via GitHub Pull Requests and CI/CD deployment pipelines.
- Integrated Vertex AI/Gemini for AI-assisted diagnostics and a 10-step RAG pipeline combining Pinecone vector search with MongoDB keyword search, achieving context-aware responses with hallucination-check validation; deployed on Netlify with Cloudinary cloud storage.

COPD Detection & Severity Classification

2025 – Present

Python, PyTorch, Librosa, CNN-LSTM | github.com/Rajath2005/COPD

- Designed and implemented a CNN-LSTM hybrid deep learning model for automated COPD detection and 4-class severity grading on the ICBHI 2017 Respiratory Sound Database (920 recordings, 6,898 annotated cycles), targeting >90% binary classification accuracy.
- Contributed code via structured GitHub workflow — feature branches, descriptive commits, and documentation updates following open-source repository guidelines.

Code Review RL Environment

2025

Python, FastAPI, Docker, Hugging Face Spaces | github.com/Rajath2005/code-review-env | huggingface.co/spaces/BugHunter28/code-review-env

- Engineered an OpenEnv-compliant reinforcement learning benchmark with 3-tier curriculum (easy/medium/hard), 32 hand-crafted Python code snippets, dense reward signals, and sandboxed code execution — deployed as a containerized open-source repository on Hugging Face Spaces via Docker.
- Maintained code readability and maintainability standards: modular architecture, inline documentation, deterministic grading logic, and reproducible benchmark scripts with seed control.

Englisho — Interactive English Learning Platform

May 2024

HTML5, CSS3, JavaScript, Web Speech API | github.com/Rajath2005/Englisho.io | englisho.netlify.app

- Won 1st place at IEEE I² CONNECT-2K24 (IEEE Mangalore Subsection & VCET, 30+ competing teams) for building an interactive ed-tech platform with quiz engine, text-to-speech, and dictionary for children learning English.
- Contributed all frontend source code to a shared repository following open-source collaboration workflows: branching strategy, pull request review, and documentation quality standards.

Developer Portfolio

2025

HTML5, CSS3, JavaScript, Netlify | rajathkiran.me | github.com/Rajath2005/rajathkiran.me

- Built and deployed a responsive portfolio showcasing 25+ live projects with an integrated AI assistant, filterable project grid, and blog; maintained a public GitHub repository with clean commit history and adherence to project guidelines.

CERTIFICATIONS & AWARDS

- IEEE I² CONNECT-2K24 Winner — IEEE Mangalore Subsection & VCET Student Branch (2024)
- 2× VTU Topper — Code360 30-Day Coding Challenge (Naukri Code360 Platform)
- Google Cloud Arcade 2026 — Silver League, 50+ badges (GCP, Kubernetes, BigQuery, CI/CD, Cloud Run, Firebase, Serverless)
- Anthropic — Claude Code in Action, AI Fluency: Framework & Foundations, Claude 101 (2026)
- Google — Google AI Essentials, Google Prompting Essentials, Maximize Productivity with AI Tools (2026)
- Cisco Networking Academy — Introduction to Cybersecurity (May 2026)
- Scaler — Node JS Certification, Docker & Kubernetes Fundamentals, React Bootcamp (2025–2026)
- NPTEL — The Joy of Computing Using Python, IIT Madras (Score: 78%, Nov 2025)
- Elements of Artificial Intelligence — University of Helsinki & MinnaLearn
- IBM SkillsBuild — Open Source Software Development | freeCodeCamp — Responsive Web Design
- Infosys Springboard — DSA, C++, Linux for Beginners
